Child & Adolescent Psychiatric Inpatient Unit

Take On Life

Halton Healthcare

To assist children, adolescents and their families
to achieve and maintain positive
mental health in all aspects

Child & Adolescent Psychiatric Inpatient Unit

The Child & Adolescent Psychiatric Inpatient Unit consists of a multidisciplinary team dedicated to the assessment and short-term stabilization of children and adolescents up to 17 years who are experiencing mental health concerns.

The team includes a child and adolescent psychiatrist, a psychiatric nurse, a social worker, child & youth counsellors, teacher and educational assistants.

Take on life

Our ten bed co-ed unit provides service to voluntary and involuntary patients who reside in Halton Region. Admission to the unit is determined after an assessment by the crisis Team in Emergency Department at Halton Healthcare (HHS), Joseph Brant Memorial Hospital (JBMH) or referral through an Outpatient Psychiatrist.

Our service includes:

- multidisciplinary, individual and family assessment.
- initiation of multidisciplinary treatment including individual, family therapy, group based social and life skills groups, educational programming, medication management and parent management strategies.
